

Together

We spent a very long time together,
were friends in emotions and travellers in time.
We thought life will last forever and love will never end
or love will last forever and life will never end?
We hurt ourselves even though we love each other
and many things have been done in vain
and time has not healed anyway every pain.
Not all our dreams have come true
and hopes have been faded away,
but i've been together, together with you.
Have been together, together with you.

Your minds are my minds and my minds are yours!
Your soul is my soul and my soul is yours!
Your heart is my heart and my heart is yours!

You know inside me your light is burning
and if it burns down also mine will burn out.
And i know inside you my light is burning
and if it burns down also your's will burn out.

Not all our dreams have come true
and hopes have been faded away,
but i've been together, together with you.
Have been together, together with you.
